Food Banks Love Peanut Butter!

7 grams of protein per serving!

30 nutrients and phytonutrients per serving

Peanut butter has a long shelf life

Peanut butter makes a hearty meal that really stick with you

Peanut butter is enjoyed by all age groups.

Peanut butter doesn’t require refrigeration

Why?

42.2 million Americans live in food insecure households. Peanut butter is a shelf stable source of protein that food banks love and need. But, often, supplies run out long before the expiration date on the labels. Please donate so that those who face food insecurity have consistent access to the nutritious foods they need.
